PROFESSIONAL SUMMARY

Full-Stack Developer with experience designing and building business applications, workflow automation systems, and LLM-integrated software. Skilled in Next.js, React, Node.js, TypeScript, Prisma ORM, MySQL, and PostgreSQL. Hands-on experience with AI agent development using LangChain and LangGraph, prompt engineering, and no-code automation with n8n. Focused on building maintainable, scalable full-stack systems that solve real operational challenges.

EDUCATION

B.S. in Information Technology, University of St. La Salle

Bacolod City, Philippines | 2021 - 2025

- Cum Laude
- Consistent Dean's Lister

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Next.js, Node.js, PHP, SQL

Backend & Database: Prisma ORM, MySQL, REST APIs, PostgreSQL

Frontend: SCSS, HTML, CSS, Tailwind CSS, React

AI & Automation: LLM Integration, OpenAPIs, N8N, Claude Code, LangChain, LangGraph

CMS / Platforms: WordPress, BigCommerce

Tools: Git, GitHub, Vercel, Railway, Supabase

PROFESSIONAL EXPERIENCE

Full-Stack Developer - OnePoint

October 2025 - Present

- Architected and built a centralized proposal management platform from the ground up using Next.js, Prisma ORM, and MySQL, replacing manual proposal workflows, reducing turnaround time by ~40% through a centralized Next.js + MySQL platform.
- Designed the system's database architecture, backend services, API layer, and application workflows to support proposal generation, approvals, version control, and document management.
- Developed production-ready full-stack features and optimized application performance, maintainability, and reliability.
- Developed RESTful APIs and backend integrations enabling data synchronization between internal systems and third-party services.

E-Commerce Developer Intern - Binary Anvil

February 2025 - May 2025

- Built and launched a responsive BigCommerce storefront with custom theme components and optimized page performance across mobile and desktop devices.
- Ensured cross-browser and cross-device compatibility through systematic testing and performance profiling.
- Collaborated with the development team using GitHub for version control, pull request reviews, and branch management.

PROJECTS

Proposal Management System | Full-stack Developer

Stack: Next.js · TypeScript · Prisma ORM · MySQL · Claude API · Vercel · Railway

- Developed a full-stack proposal management platform to create, manage, and track client proposals across the entire sales lifecycle.
- Integrated AI-powered features for discovery session assistance, automated brief generation, and end-to-end proposal creation using LLM integration.
- Implemented secure authentication, role-based access control (RBAC), document workflows, and multi-stage approval processes.
- Designed normalized relational database architecture using Prisma ORM and MySQL, and built RESTful APIs for proposal management and version control.
- Deployed and maintained production application using Vercel and Railway.

AI Expense Tracker | Full-stack Developer

Stack: Next.js · TypeScript · Supabase · PostgreSQL · n8n · AI Vision API

- Developed an AI-powered expense management platform that automates receipt processing, expense tracking, and financial record organization.
- Built an automated receipt analysis workflow using AI vision models to extract merchant details, transaction amounts, dates, and itemized expenses with high accuracy.
- Designed normalized relational database schema using Supabase and PostgreSQL with structured receipt and line-item tables.
- Implemented end-to-end backend workflows for image processing, data extraction, file management, and automated expense categorization using n8n.

LEADERSHIP

Governor - College of Engineering and Computing Studies Student Council | 2024 - 2025

Third Year Level Representative- College of Engineering and Technology Student Council | 2023 - 2024
