EDUCATION

B.S. in Information Technology
University of St. La Salle
Bacolod City, Philippines
2021 – 2025

- Cum Laude
- Consistent Dean's Lister

TECHNICAL SKILLS

Languages & Frameworks:

JavaScript, Next.js, React, Node.js, PHP, SQL

Backend & Database: Prisma

ORM, MySQL, REST APIs

Frontend: SCSS, HTML, CSS

CMS / Platforms: WordPress, BigCommerce

Tools: Git, GitHub

ADDITIONAL EXPERIENCE

College Council Governor

- Led student programs and coordinated with multiple departments

PROFESSIONAL EXPERIENCE

Lead Developer - OnePoint

October 2025 - Present

- Lead development of modern web applications using Next.js, Prisma ORM, and MySQL
- Design and maintain scalable database architectures and backend services
- Develop production-ready features while improving maintainability and performance
- Build and integrate REST APIs for business applications
- Collaborate with stakeholders to translate requirements into technical solutions
- Explore and prototype AI-powered automation workflows for marketing operations
- Contribute to architecture decisions, development standards, and code quality initiatives

E-Commerce Developer Intern - Binary Anvil

February 2025 - May 2025

- Developed a responsive e-commerce website using BigCommerce
- Ensured cross-device compatibility and performance optimization
- Collaborated with team members using GitHub for version control

PROJECTS

Komyuter: Realtime Modern Jeepney Tracker | Lead Developer

Capstone Project

- Built a GPS-based tracking system for real-time vehicle monitoring
- Developed a PHP-based web platform and integrated tracking data
- Contributed to mobile integration using Flutter

Proposal Management System | Full-stack Developer

- Developed an internal platform for managing proposals and client-facing documents
- Designed relational database structures and backend business logic
- CRUD operations and API endpoints

Client Success Persistent Memory Assistant | Developer

- Developed an AI-powered application for generating client success briefs and contextual summaries
- Integrated LLM-based workflows for information retrieval and content generation
- Designed structured memory management for maintaining client context across interactions
